

Jingle Bells #1

***CHORUS:**

Jerry Brown, Jerry

Brown

Keep it in the ground

Think about our planet

earth and please don't let

us down

X2

Putting on a show

From Chico to the Bay

Selling us your cap and
trade

Like we were born today

Telling us it's good

A progressive stand to have

But permitting carbon
trading

Won't allow clean air to last

***CHORUS**

Meanwhile farther south

Fires are raging wild

People are evacuated,

women, men and child

I really hate to think

The chaos there would be

If fires reached refineries,

the damage there would be

***CHORUS**

You say you are the best

Climate hero there could be

But you seem to look at

dollar signs

And not at families

Why don't you tell the truth

About how you are a fraud

Saying that you love the

Earth

While giving big oil a nod

***CHORUS x2**
