

(We Wish You A Merry  
Christmas)#2:

We wish for clean air and water	We won't stop until we change things
For the sake of our sons and daughters	And totally rearrange things Our hearts full of hope we all sing
And our world that is getting hotter	To you Jerry Borwn
And we wish it right now	With love for the earth to guide us
We wish you would take some action	possibilities that excite us
To stop all of this extraction	we hope you will stand beside us
Especially hydrofraction	and turn this around.
And leave oil in the ground
